## ART PROCESS METHODS

X

Our screen print process method for all Tech and other Polyester based fabrications. This process method is designed to give the most accurate color while also preventing dye migration.

CC

Used for our Performance Cotton platforms. It is available in based (XCC) and un-based (PCC) options to give a clean, graphic look vs. a softer, weathered feel.

LTX

Our Microthread fabrics have a lighter weight than our other fabric platforms; this process allows for less ink coverage with open type and smaller graphics overall.

E

Embroidery is a cornerstone decoration process for our left chest graphic options.

VT

VersaTwill is a patch process that utilizes other fabrics much like traditional appliqué. It is superior to appliqué with its larger library of fabric choices and techniques. Also, since it's applied with adhesive, there is no messy stitching on the inside of the garment.

VTP

A special VersaTwill process specifically for polos and outerwear. This can give this category and modern and elevated look versus traditional embroidery.

CP

Cold press is a patch application that allows for great detail and an amazing hand. Available on a myriad of product from Golf polos to Quarter Zips, and Shorts.

RSP

An updated technique for the left chest decoration, Raised Silicone Patches give the graphic a 3-D effect with durable, silicone rubber. These patches hold great color and detail and offer a modern, raised look for our Golf collection.

## PERFORMANCE DNA

Every Under Armour® product is doing something for you: it's making you better. The following are core pieces of DNA that deliver on this promise. The building blocks of performance.

### **STORM**

Water Repellent  
Performance Fabric

**FITTED**

A slimmer, athletic cut that allows total mobility but eliminates the bulk of extra fabric.

### **CHARGED COTTON®**

Super Soft Hand Feel

**LOOSE**

Fuller cut for complete comfort, total range of motion & greater breathability.
